

Rod Set Services

A rod set is a beautiful, heat-conscious alternative to traditional curling methods. Instead of relying on hot tools to create curl definition, hair is wrapped around flexi rods or curl rods while wet, then dried in place — resulting in a uniform, smooth curl from root to tip. It's an ideal service for clients who want to give their hair a break from heat and tension, or who are dealing with heat damage, breakage, or uneven curl patterns and want one consistent, healthy curl texture throughout. Just like our silk press, the rod set is offered in multiple tiers, so clients can choose the level of service that best matches what their hair needs. Below is a full breakdown of each option.

1. Classic Rod Set

What you get: This is our foundational rod set service, built to deliver smooth, uniform curls without the extras. It includes:

- A thorough wash and cleanse of the hair to remove product buildup and prep the hair for setting
- Hair combed out and carefully sectioned to ensure even, consistent results throughout the whole head
- Small, precise sections wrapped around each rod, with end papers used on every section so the ends dry smooth instead of frizzy or bent
- Time under the dryer to fully set each curl — this step is essential, since a rod set needs to dry completely to hold its shape and shine
- A finish of soft, shiny, fluffy curls that run uniformly from root to tip

What's not included: The Classic Rod Set does not include a scalp/hair assessment or spa treatment, and it does not include a trim. If your hair needs extra moisture, scalp care, or your ends are damaged or overdue for a cut, one of our upgraded options below will serve you better.

Best for: Clients with healthy, well-maintained hair who simply want a gorgeous, uniform curl set with minimal heat and tension — or who want a break from more manipulative styling.

2. Rod Set + Spa Treatment

What you get: This tier adds a customized deep-conditioning treatment before the set, giving your hair real repair and moisture along with the style. It includes:

- A full scalp and hair assessment, so we can determine exactly what your hair needs before we begin
- A targeted spa treatment or deep conditioner, applied to the scalp and/or hair based on that assessment
- Cleansing and blow-drying of the hair to prep for an extended, longer-lasting curl
- Small, precise sections wrapped around each rod with end papers for smooth, root-to-tip curl definition
- Application of our moisturizing holding foam, which locks in moisture while giving the curl a soft, defined finish
- Full dryer time to set the curls completely
- A finish of soft, shiny, moisturized curls from root to tip

What's not included: This service does not include a trim. Your curls will look and feel healthier and more moisturized, but any damaged or split ends will still be present after your appointment. If your ends need attention, consider adding a trim or choosing our fully upgraded option.

Best for: Clients whose hair feels dry, over-processed, or lacking moisture, or anyone recovering from heat damage who wants their scalp and strands genuinely treated — not just styled.

3. Rod Set + Trim

What you get: This option keeps the classic rod set process but adds a precision trim to remove dead, split, or unhealthy ends. It includes everything from the Classic Rod Set, plus:

- A precision trim to cut away split ends, dead hair, or any unruly, damaged strands before or after the set

Why the trim matters: Split ends don't stay put — left untreated, that damage travels up the hair shaft over time, the same way a shoelace unravels once the plastic tip wears away. Trimming regularly stops that damage before it spreads, giving you smoother

curls, healthier-looking ends, and a set that holds its shape longer. We generally recommend a trim at least once a quarter, though this can vary depending on how often you manipulate or heat-style your hair.

What’s not included: This service does not include a scalp/hair assessment or spa treatment. If your hair needs deep moisture or scalp care in addition to a trim, our fully upgraded Deluxe Rod Set below covers everything.

Best for: Clients whose hair is otherwise healthy but whose ends are due for a cut, or anyone who wants their rod set to last longer with stronger, healthier ends.

4. Deluxe Rod Set (Spa Treatment + Trim)

What you get: This is our most complete rod set experience, combining everything from the Spa Treatment tier with a precision trim, so both the health of your hair and the condition of your ends are addressed in one visit. It includes:

- A full scalp and hair assessment to determine your hair’s specific needs
- A customized spa treatment or deep conditioner applied to the scalp and/or hair
- Cleansing and blow-drying to prep for an extended curl
- Small, precise sections wrapped around each rod with end papers for smooth, root-to-tip definition
- Application of our moisturizing holding foam for a soft, defined, moisturized finish
- A precision trim to remove dead or split ends
- Full dryer time to completely set the curls
- A finish of soft, shiny, healthy, uniform curls from root to tip, on hair that’s been treated, styled, and maintained all in one appointment

What’s not included: Nothing is left out here — this is the complete package, covering treatment, styling, and maintenance in a single service.

Best for: Clients who want the full reset: a moisturizing treatment, gorgeous uniform curls, and healthy, well-maintained ends, all at once.

Quick Comparison

--	--	--	--	--

Included	Classic Rod Set	Rod Set + Spa Treatment	Rod Set + Trim	Deluxe Rod Set
Wash & cleanse	✓	✓	✓	✓
Scalp/hair assessment	—	✓	—	✓
Spa treatment / deep conditioner	—	✓	—	✓
Moisturizing holding foam	—	✓	—	✓
Rod set with end papers	✓	✓	✓	✓
Dryer time	✓	✓	✓	✓
Precision trim	—	—	✓	✓

Each tier lets clients choose exactly how much their hair needs beyond the set itself — a simple, beautiful curl, a deeper treatment, a trim, or the full combination of both.
