

Weave Installs at October Glory

Looking for a flawless, natural-looking weave install in Brooklyn? At October Glory, every sew-in weave is a custom foundation for your hair, not a one-size-fits-all service.

Whether you're searching for a full weave with closure or a weave with leave out, each install starts with the health of your natural hair and ends with a cut tailored to your face shape. Please note: hair is not included with either service, but bundles, closures, and frontals can be added for a separate cost so you leave with everything needed for a seamless result.

Weave With Leave-Out

Our weave with leave-out is a classic sew-in method designed to blend your natural hair with your extensions for the most undetectable, natural-looking weave possible. This protective style is perfect for clients who want the fullness and length of a weave install while still showing a bit of their own hair to soften the hairline and mimic a completely natural growth pattern.

What's included:

- **Cleansing wash** to remove buildup and ensure a clean, healthy scalp before installation
- **Protein-infused deep conditioning treatment** to strengthen weakened strands and restore elasticity
- **Moisture treatment** for soft, malleable hair that lays flat and blends seamlessly with your extensions
- **Full hair and scalp assessment** to determine the healthiest, most natural install method for your texture
- **Custom-sized foundation braids**, built according to the density of your natural hair for a flat, secure base with no bulk
- **Sew-in weave installation** using your leave-out to conceal tracks completely, so there is zero visible weave line
- **Protective net** sewn over the foundation braids to minimize shedding and keep your hair organized as your braids grow out underneath the weave

- **Custom cut and style** to accentuate your natural face shape and complete your desired finished look

With this method, a small portion of your natural hair is left out around the perimeter to conceal the tracks underneath. This gives you the most seamless, undetectable blend between your natural hair and the extensions, ideal for clients who love the look of their own edges and hairline framing the style. Because your natural hair is exposed and receiving daily styling, product, and heat, this install typically lasts up to 2.5 months before it's time for a fresh application, wash, and reinstall. This is a wonderful option for anyone wanting length, volume, and versatility while keeping a natural, your-hair-grew-this-way appearance.

Full Weave With Closure

Our full weave with closure is a 100% protective style, meaning none of your natural hair is left out (aside from a very minimal amount along the hairline). Instead, a lace closure is used to simulate a natural part, giving you the flexibility to style your hair in multiple directions while keeping your real hair fully protected underneath.

What's included:

- **Cleansing wash** to purify the scalp and prepare a healthy foundation for the install
- **Protein-infused deep conditioning treatment** to rebuild strength in fragile or damaged strands
- **Moisture treatment** for soft, pliable hair that lays flat under the closure
- **Full hair and scalp assessment** for the flattest, most natural-looking closure install
- **Custom-sized foundation braids**, mapped and sized based on your natural hair's density for a secure, comfortable base
- **Closure installation** designed to simulate a realistic, natural-looking part
- **Protective net** sewn over the foundation braids to minimize shedding and keep your hair organized as your braids grow out underneath the weave
- **Custom cut and style**, cut to flatter your individual face shape and finished in your desired style

Because none of your natural hair is exposed to daily manipulation, heat, or product, a full weave with closure is one of the best protective styles for length retention and hair growth. Your natural hair gets true rest and recovery underneath, away from friction, styling tools, and environmental stress, while the closure gives you a completely

natural-looking part and hairline on top. This is a longer-wear protective style, typically lasting 4 to 6 weeks before it needs to be taken down, allowing your scalp and natural hair to recover in between installs.

Caring for Your Weave Install

To get the most out of your sew-in weave, proper aftercare is key. Sleep with a satin or silk bonnet or pillowcase to reduce friction and frizz. Use a light, water-based moisturizer to keep your leave-out or closure hydrated between wash days, and avoid heavy oils at the root that can cause buildup on your foundation braids. Scheduling a scalp cleanse partway through your install helps prevent itching and buildup, keeping your extensions and natural hair healthy for the full duration of wear.

Frequently Asked Questions

Does the price include hair? No. Both weave services are strictly labor and service based only; hair is not included but can be added on for a separate cost. Bundles, closures, and frontals are available so you can walk in with everything needed for your appointment.

How long will my weave install last? A weave with leave-out typically lasts up to 2.5 months, while a full weave with closure typically lasts 4 to 6 weeks. Wear time can vary based on your natural hair growth, scalp oil production, and how well the style is maintained at home.

Will a weave install damage my natural hair? When properly installed and cared for, a sew-in weave is one of the most protective styling options available. Foundation braids are custom-sized to your hair's density to avoid tension, and your natural hair is deep conditioned with a protein and moisture treatment before every install to stay strong underneath.

What's the difference between a leave-out and a closure install? With leave-out, a small section of your natural hair blends with the extensions to conceal the tracks for a soft, natural transition. With closure, none of your natural hair is left out except a minimal amount at the hairline, and a lace closure simulates a natural part for true rest and recovery.

Which Weave Install Is Right for You?

If you love the look of your natural hairline and want a slightly more flexible, blended style, the **weave with leave-out** is your best bet, with wear time extending up to 2.5 months. If your goal is maximum protection, length retention, and giving your natural

hair a true break from daily styling, the **full weave with closure** is the better choice, with a typical wear time of 4 to 6 weeks.

Every install at October Glory begins with a wash and protein-infused deep conditioning treatment to build your new style on a strong, healthy foundation, not just hair on top of stressed strands. Foundation braids are always custom-sized to your natural hair's density, so your install lays flat, feels comfortable, and holds up over time. And because every face is different, every install ends with a personalized cut designed to frame and flatter your features.

Ready to book your next weave install or protective style consultation? Reach out to October Glory to discuss whether a weave with leave-out or a full weave with closure fits your hair goals, texture, and lifestyle. Bundles, closures, and frontals are available as add-ons if you need hair for your appointment.
